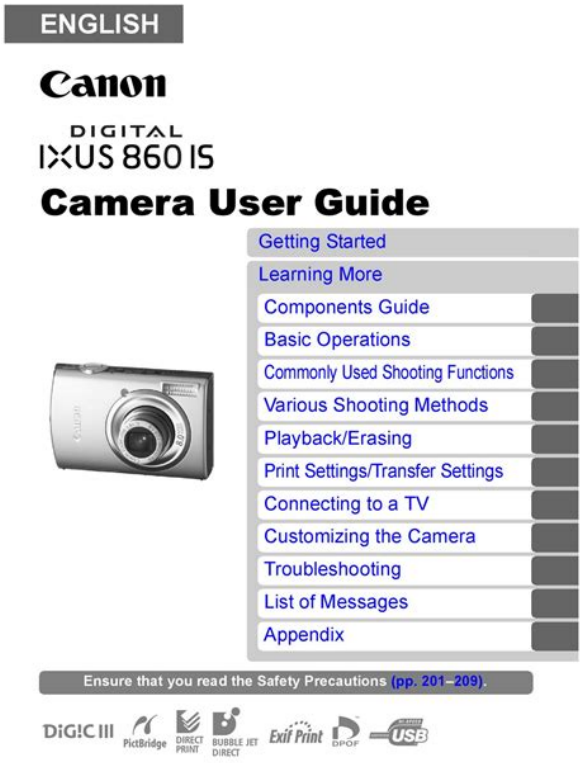
Place the Canon Digital Camera Solution Disk in the computers CDROM drive. CameraWindow will display. Use this method to download images using camera operations except Windows 2000. Button Button Buttons Button. The previous setting will be in effect the next time the Direct Transfer menu is displayed.Some accessories are not sold in some regions, or may no longer be available.If so, remove the film before using the camera. The interface cable and AV cable cannot be connected. By holding down the touch control dial in the position of the enlarged icon, you can determine the item to set. Please note that some of the options for some functions cannot be operated with it. Operable Functions Reference Page Shooting Selecting a shooting mode p. 44 71, 72, 73, 85, Selecting options in Selecting options in the FUNC. Movie Mode Shooting Mode Special Scene Mode Shooting Mode Auto p. 14 Manual p. 84 Digital Macro p. 70 Color Accent p. If you hold the camera horizontally, it displays the time. If you hold it vertically, the time and date display. However, if you hold the camera vertically and use method 1 to display the date and time, the time will be initially displayed in the same way as when the camera is held horizontally. Menu Item Page Menu Item Page Shooting Mode p. 44 p. 114 My Colors Special Scene Mode p. Operation Sound Sets the sound played when any button other than the shutter button is pressed. p. 184 Selftimer Sound Sets the sound played 2 seconds before the shutter releases in selftimer mode. The LCD monitor is set to the Information View in the mode. The LCD monitor will not switch to the detailed display or focus check display while in the magnified display or index playback mode. During flash photography, however, the camera automatically readjusts the ISO speed, shutter speed or aperture setting to an optimal setting, which may cause the playback information to differ from the displayed information.https://www.dianasbridal.com/UserFiles/dolphin-570-manual.xml



A sound file in a format other than the WAVE format is attached or the file format is not recognized. JPEG image not conforming to Design rule for Camera File System Standards p. If you change the date and time when the World option is selected, the Home date and time will also change automatically. Please note that formatting initializing a memory card erases all data, including protected images and other file types. The available shooting characteristics and focal lengths 35mm film equivalent are as follows Selection. Safety Zoom Zone This camera is equipped with a Safety Zoom feature that shifts from optical zoom to digital zoom without pausing until image quality is lost at any given recording pixel setting. The. With the digital zoom, the image area is 12 x 9 mm 0.47 x 0.35 in. at maximum zoom approximately 4.0x. You can set the time delay and the numbers of shots you wish to take in advance. 10 sec. SelfTimer shoots 10 seconds after you press the shutter button. You can shoot images with the optimal settings for postcards by composing them inside the print area widthtoheight ratio of approximately 32 shown in the LCD monitor. Select the Postcard Mode. The date stamp cannot be deleted from the image data once it has been embedded. For details, please see the user guide for each product. Setting the Image Stabilizer Function See Functions Available in Each Shooting Mode 228. If camera shake is too strong, it may not be fully corrected. Hold the camera horizontally while panning stabilization does not work when the camera is held vertically. You can shoot with the most appropriate settings for the scene. Beach Shoots without making people appear dark near water or sand where reflected sunlight is strong. Fireworks Captures fireworks in the sky sharply and at optimal exposure. You are also recommended to use this case for shooting in rainy conditions, at the beach or on the ski slopes.

Allows you to select settings yourself, such as the exposure compensation, white balance or my colors. Select manual mode. 1. Set the mode switch to 2. Press the button. 1. Use the button to select Shoot. This function reduces the red appearance of eyes when the flash fires and light is reflected back.You can shoot with the flash at slow shutter speeds. You can limit the extent to which only the background darkens with flash photography while shooting night scenes or under indoor lighting. Depending on the volume and data writing speed of the memory card, recording may stop before reaching 1 hour or before the recorded data volume has reached 4 GB. This is effective on ski slopes and the beach when the contrast is too strong between the subject and background or where there are both light and dark areas in the scene and it is desirable to adjust the exposure. The LCD

monitor will turn on if something other than the power button or shutter button is operated. The LCD monitor displays the elapsed time from the start of recording to the end in playback mode, but the actual playback time is shorter than the displayed time. Stitch Assist can be used to shoot overlapping images that can later be merged stitched to create one panoramic image on a computer. The overlapping seams of several adjacent images can be joined into a single panoramic image. Press the button after the last shot. You cannot display the images on a TV when shooting in Stitch Assist mode. The settings for the first image are applied to the second image onward. You can check the focus in recorded images. It is also easy to check peoples' expressions and look for closed eyes because a frame the size of the face displays in Face Detect mode. To Cancel Checking the Focus Press the shutter button halfway. The AF frame indicates the area of the composition on which the camera focuses. You can set the AF frame in the following ways. You can have the camera automatically detect the.

You can set the exposure and focus separately. This is effective when the contrast is too strong between the subject and background or when a subject is backlit. Press the button and select flash off. You can lock the flash exposure so that the exposure settings are correctly set regardless of the composition of your subject. Press the button and select flash on. Raise the ISO speed to use a fast shutter speed when you wish to reduce the effects of camera shake or avoid blurry subjects, or to turn the flash off when shooting in a dark area. Now press the shutter button fully. Adjust the exposure compensation to a negative value to avoid making the subject too bright in night shots or when shot against a dark background. Use this setting when Spot you want to set the exposure on the subject in the center of the monitor. You can set the shutter speed to a slow setting to make dark subjects appear brighter. Select the Long Shutter Mode. 1. Press the button. Shoot with the camera attached to a tripod. Use of the flash may result in an overexposed image. If this occurs, shoot with the flash set to The following are unavailable. When the setting cannot produce natural looking colors, change the white balance using a setting appropriate for the light source. Auto Settings are automatically set by the camera. Day Light For recording outdoors on a bright day. Since the white balance data cannot be read in Stitch Assist mode, preset the white balance in another shooting mode beforehand. You may not obtain the expected results depending on the skin color. Press the button. You can shoot images with the original colors transformed. This can be performed on movies as well as still images, allowing you to enjoy photographing with image or movie effects.However, depending on the shooting conditions, the images may appear rough or you may not get the expected color. Still Images 1. Set the mode switch to 2. Press the button. 3. Use the button to select.

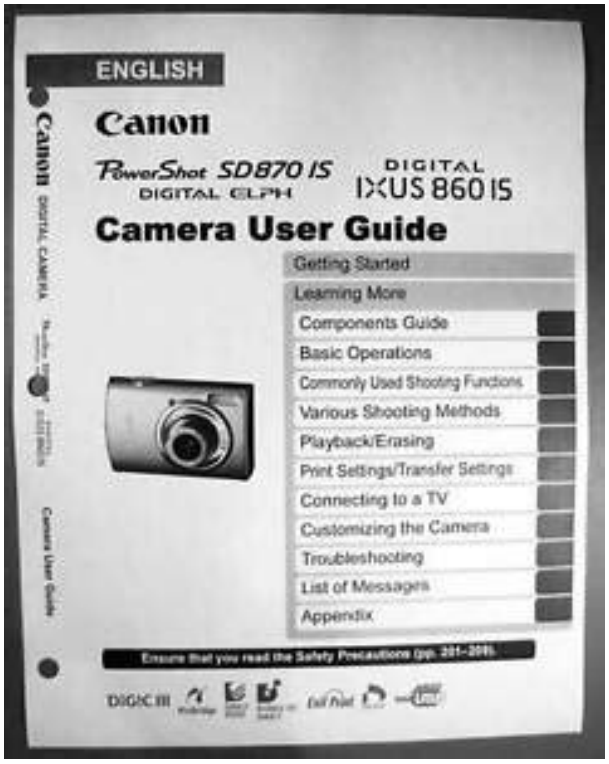
The following functions can be registered. Menu Item Page. After using this function once, the white balance setting changes to the custom white balance setting. To Folder create an additional folder, insert the check mark again. You can also specify a date and time if you wish to create a new Auto Create folder using a shooting time after the specified date and time. Up to 2000 images can be saved into one folder. A new folder will automatically be created when you record more than that. If a memory card with recorded data is used, the 7digit number for the last recorded folder and image is compared with the last one on the card, and the larger of the two is utilized as the basis for new images. Since you can also change the magnification level and switch between images, it is easy to check peoples' expressions and look for closed eyes. After you change the display magnification, the orange frame will adjust to the size of the face when you switch the position of the frame.Jumps to the first image of each shooting Shot Date date. This also can be set in the index playback mode. Depending on the movies file size, it may take some time to save an edited movie. No transition effect. The displayed image darkens and the next image gradually brightens until it is displayed. Press the button to have the previous image display from the left and the button to have the next image display from the right. No transition effect. The new image gradually brightens as it moves upward from the bottom. Up to 998 images can be selected. They will be played back in their order of selection. The following selection of My Colors effects is available. For details, see 114. Vivid Lighter Skin Tone Neutral. Although My Colors effects can be added any number of times to an image, the image quality will gradually deteriorate with each application and the intended colors may not be achieved. Movies and images shot in wide mode cannot be resized. Record Starts recording.

http://churchoftheresurrectionacc.com/images/bryco-arms-model-38-manual.pdf



Pause Stops recording, playback. Play Plays back. Erase Erases. You cannot attach sound memos to movies. Sound memos for protected images cannot be erased. See Sound Recorder Data Rates and Recording Durations Estimated 220. Recording will automatically stop when the memory card is full. You can configure the protection settings for each Select image singly while viewing them. You can select a first and last image and protect all Select Range the images in the range. Select by Date You can protect the images from a specified date. Protect the images. Select Erase images after selecting them one at a time. For picking a first and last image and erasing all the Select Range images in the range. Select by Date Erases images corresponding to the selected date. When you press the button in shooting mode, it switches the camera to playback mode. Then when it is pressed a second time, the registered function is called up. Registering a function to the button disables its ability to turn off the camera power. A maximum of 998 images can be selected. When the camera is connected to a printer, the button will light blue. At this time, printing will begin after performing the following. 1. Press the button. Refer to the Software Starter Guide for instructions on how to transfer images to your computer. The settings used on the camera comply with the DPOF standards. A maximum of 998 images can be selected. Turn off the camera and the TV.See My Camera allows you to customize the startup image and startup, operation, selftimer and shutter sounds. You can change and register these settings, enabling you to customize the camera to suit your own tastes. A computer is required to restore the My Camera settings to the defaults. See the supplied Software Starter Guide for more information on creating and adding to the My Camera data. Power is not turned on. Press the power button 14. The LCD monitor will shut off during shooting.A bar of light purplish red appears on the LCD monitor.

Sometimes appears when This is a normal occurrence in shooting a bright subject,. Camera automatically There is no effect on the recorded lightened the image image.Shooting Camera will not record. Subject in recorded image is too bright, or image flashes white. Subject is too close, making Shoot with the subject within the the flash too strong. For higher image quality, use as low an ISO speed as possible 104.White dots appear on the image. Memory card was formatted Use a memory card formatted in your in another device. There is insufficient free Try the following procedures.Movies do not play back correctly. Movies recorded with high recording pixels and frame rates may momentarily stop playing if played on slow reading memory cards. You may experience frame dropping and audio breakup when playing back a movie on a computer with insufficient

system resources. Battery life exceeded. Replace the battery with a new one TV monitor output Image is distorted or not showing on TV monitor. Incorrect video system Set the video system to the setting.No memory card You turned on the camera without a memory card installed, or with a memory card installed in the wrong orientation Card locked. The SD memory card or SDHC memory card is writeprotected 208. The file name could not be created because there is an image with the same name as the folder that the camera is attempting to create, or the highest possible file number has already been reached.In addition, sound cannot be played back. Cannot register this image. You attempted to register an image recorded in a different camera or a movie as a startup image. The safety precautions noted on the following pages are intended to instruct you in the safe and correct operation of the camera and its accessories to prevent injuries or damage to yourself, other persons and equipment. If the exterior comes into contact with liquids or salt air, wipe it dry with a soft, absorbent cloth.

Continued use of the equipment may result in fire or electrical shock. The battery should not be immersed in water or sea water. Do not attempt to disassemble, alter or apply heat to the battery. Be careful not to bump or strongly push the end of the lens. The abovementioned could lead to injury or damage the equipment. Be careful not to cover the flash with your fingers or clothing when shooting. Under these conditions, revive the battery by warming it in a pocket immediately before use. However, ensure that there are no metallic items in the pocket that could cause a short circuit, such as a key ring, etc. When writing on the memory card, do not use a pencil or ball point pen. Only use a soft point pen e.g. felttip pen. Turn the camera power off before connecting or disconnecting the AC adapter. Use the following procedures to affix the camera and HighPower Flash to the supporting bracket. You are recommended to place the spare battery in your pocket to warm it up before switching it for the battery in the flash. NonUse over Extended Periods Leaving batteries in the HighPower Flash could allow the battery fluid to leak, damaging the product. Camera Body Gently wipe dirt off the camera body with a soft cloth or eyeglass lens wiper. Lens First use a lens blower brush to remove dust and dirt, then remove any remaining dirt by wiping the lens lightly with a soft cloth. Subject to change without notice. DIGITAL IXUS 860 IS W Max.Depending on the volume and data. At low temperatures, the battery performance may diminish and the low battery icon may appear very rapidly. In these circumstances, the performance can be improved by warming the battery in a pocket before use.Actual results may vary according to the subject and shooting conditions.
